Problem – Solution Fit Template

Date	29 June 2026
Project Name	Leave Approval System
Maximum Marks	2 Marks

The Problem–Solution Fit for the Leave Approval System focuses on identifying the challenges faced by employees and managers in the leave approval process and providing an automated ServiceNow-based solution that effectively addresses those challenges. The system improves efficiency by replacing manual, paper-based leave management with a transparent, secure, and automated workflow.

Purpose

- Automate the employee leave request and manager approval process.
- Reduce manual paperwork, approval delays, and communication gaps.
- Improve transparency by allowing employees to track the status of their leave requests.
- Enhance employee and manager experience through automated workflows and email notifications.
- Validate leave details using Client Scripts to prevent invalid leave requests.
- Maintain secure and centralized leave records using the ServiceNow platform.
- Provide a scalable and reliable leave management solution that can be extended with additional HR features in the future.
