

Project Design Phase
Proposed Solution Template

Date	29 June 2026
Team ID	
Project Name	
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	Manual leave approval is time-consuming, prone to errors, and lacks proper tracking. Employees and managers need an automated system to manage leave requests efficiently.
2	Idea / Solution Description	Develop a Leave Approval System in ServiceNow where employees submit leave requests with leave type, start date, end date, and reason. The system validates the dates, sends the request to the manager through Flow Designer for approval, updates the request status, and sends email notifications to the employee.
3	Novelty / Uniqueness	Uses ServiceNow Flow Designer to automate the approval process, validates leave dates before submission, updates records automatically, and sends instant approval/rejection notifications without manual intervention.
4	Social Impact / Customer Satisfaction	Reduces paperwork, speeds up leave approvals, improves transparency, minimizes errors, and provides employees with timely updates on their leave requests.
5	Business Model (Revenue Model)	Can be implemented by organizations as an internal HR solution. Organizations using ServiceNow can integrate it into their HR processes to improve productivity and reduce administrative effort.
6	Scalability of the Solution	The solution can be extended to support multiple departments, multi-level approvals, leave balance tracking, holiday calendars, reporting dashboards, and mobile access for large organizations.
