| Project Name  | Leave Approval System |
| Maximum Marks | 4 Marks               |

### Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

## User Stories

Use the below template to list all the user stories for the product.

| User Type     | Functional Requirement (Epic) | User Story Number | User Story / Task                                                                                   | Acceptance Criteria                                                     | Priority | Release  |
|---------------|-------------------------------|-------------------|-----------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------|----------|----------|
| Employee      | Apply for Leave               | USN-1             | As an employee, I can apply for leave by entering the leave type, start date, end date, and reason. | The leave request is submitted successfully.                            | High     | Sprint-1 |
|               | Apply for Leave               | USN-2             | As an employee, I want the system to validate that the end date is not earlier than the start date. | An error message is displayed if the end date is before the start date. | High     | Sprint-1 |
|               | Leave Approval                | USN-3             | As an employee, I can submit my leave request for manager approval.                                 | The request status becomes Pending and is sent to the manager.          | High     | Sprint-1 |
|               | Leave Status                  | USN-4             | As an employee, I can view the status of my leave request.                                          | I can see whether the request is Pending, Approved, or Rejected.        | Medium   | Sprint-1 |
|               | Notifications                 | USN-5             | As an employee, I receive an email when my leave request is approved or rejected.                   | The email notification is received successfully.                        | High     | Sprint-1 |
| Manager       | Review Leave Request          | USN-6             | As a manager, I can view pending leave requests assigned to me.                                     | All assigned pending requests are displayed.                            | High     | Sprint-1 |
|               | Approve/Reject Leave          | USN-7             | As a manager, I can approve or reject an employee's leave request.                                  | The leave status changes to Approved or Rejected.                       | High     | Sprint-1 |
|               | Notifications                 | USN-8             | As a manager, I receive notification when a new leave request is submitted.                         | The notification appears in ServiceNow or email.                        | Medium   | Sprint-1 |
| Administrator | Custom Application            | USN-9             | As an administrator, I can create and manage the Leave Approval application.                        | The application is available and accessible.                            | High     | Sprint-1 |
|               | Leave Management              | USN-10            | As an administrator, I can manage leave records and leave types.                                    | Leave records and types can be created, updated, and viewed.            | Medium   | Sprint-2 |
|               | Flow Designer                 | USN-11            | As an administrator, I can configure the approval workflow using Flow Designer.                     | Leave requests are automatically routed to the manager for approval.    | High     | Sprint-1 |
|               | Email Notifications           | USN-12            | As an administrator, I can configure approval and rejection email notifications.                    | Employees receive the correct email based on the manager's decision.    | Medium   | Sprint-2 |
|               | Security                      | USN-13            | As an administrator, I can assign roles and permissions for employees and managers.                 | Users can access only the features allowed by their roles.              | Medium   | Sprint-2 |
|               | Reporting                     | USN-14            | As an administrator, I can view all leave requests and their statuses.                              | All leave records are available for monitoring and reporting.           | Low      | Sprint-2 |
